# Just made for dog lovers: ŠKODA offers comprehensive accessories for keeping your dogs safe in the car

- > ŠKODA Genuine Accessories: Practical solutions for travelling with dogs
- > 4 paws in the back: from doggie seatbelts to dog guards

**Mladá Boleslav, 17 July 2015 – Summertime means holiday season – the nicest weeks of the year have begun. ŠKODA now offers practical accessories for dog owners who love to take their four-paw companions on holiday with them in the car. The simply clever range includes everything from seatbelts to pet barriers.**

Whether human or animal – the safety of all passengers is a top priority for ŠKODA. With a dog on the back seat, **Dog Safety Belt** is an indispensable item in the ŠKODA Genuine Accessories range. In the event of a collision, the animal could be thrown forward, which would be dangerous for both the dog and those sitting in the front. The seatbelt also prevents the dog from moving around in the back, which might be distracting for the driver. ŠKODA's doggie seat belt comes in four sizes – from S to XL. This item has an additional practical feature; it can also be used in combination with a lead for dog training or walking.

If your furry family member is sitting in the back, ŠKODA's practical **Backseat Protection** will ensure that the upholstery stays clean. Be it in the ŠKODA Citigo or ŠKODA Superb, the protector is large enough to cover the entire backseat and stop hair and dirt from getting on the seats or floor. The solid material of the cover is water-resistant and easily washable. The non-slip surface also increases safety for the animal while the car is moving. The cover is easily fixed in place using hooks and fasteners attached to the front and rear headrests.

Many dog owners appreciate the space and functionality of a ŠKODA estate model. The **Trunk grille of the luggage compartment** available for the ŠKODA Fabia Estate, Octavia Estate and Superb Estate enable your pet to sit safely in the boot section. This accessory effectively divides the boot into two sections, with the dog in one area and your suitcases and other items in the other. This is both a practical and safe solution.

The same is true of the **Trunk grille**, especially designed for the boot of the ŠKODA Fabia Estate and ŠKODA Superb Estate. This vertical guard, positioned directly behind the rear headrests, prevents the dog from climbing over onto the backseat from the boot. This practical solution gives the driver a clear view thanks to its lattice design.

To keep the boot as clean as possible, even when your companions have been playing outdoors, all ŠKODA models are available with tailor-fitted protective mats and inserts. The **Rubber boot Mats** is moulded exactly to the shape of the boot-floor and does not

## Press Release page 2 of 3

have to be specially secured. This mat can easily be removed and cleaned whenever necessary. The ŠKODA Genuine Accessories range also includes a robust **Plastic Protective Liner** for the boot.

The ŠKODA Rapid, Rapid Spaceback, Yeti, Octavia and Octavia Estate come with a **double-sided floor covering for the boot** on request. One side is covered with carpet, the other side with a dirt and water-repellent material. When travelling with a friend with mucky paws, simply flip it over onto the easy-clean side.
